

New type of XSPA underwater light(SR2402)/Perimeter LED lights connection diagram

Connecting explanation:

1. The drawing above is the complete diagram for the XSPA/IP control system come with XSPA underwater light (+ambient light + LED logo plate), disconnected if anything not included (eg: There will be no connector for the LED logo plate if the LED logo plate not included.)
2. For the Gecko control system, if the power is DC, need to be used as requirements.
3. For the other brand of control system which need to use the common underwater light power supply, then need to reference the diagram of the common power supply.
4. For any question; please consult to the technical department.
